Tink.you

The WhatsApp integration to collect donations & tips.

Belgium & Luxembourg — 2026

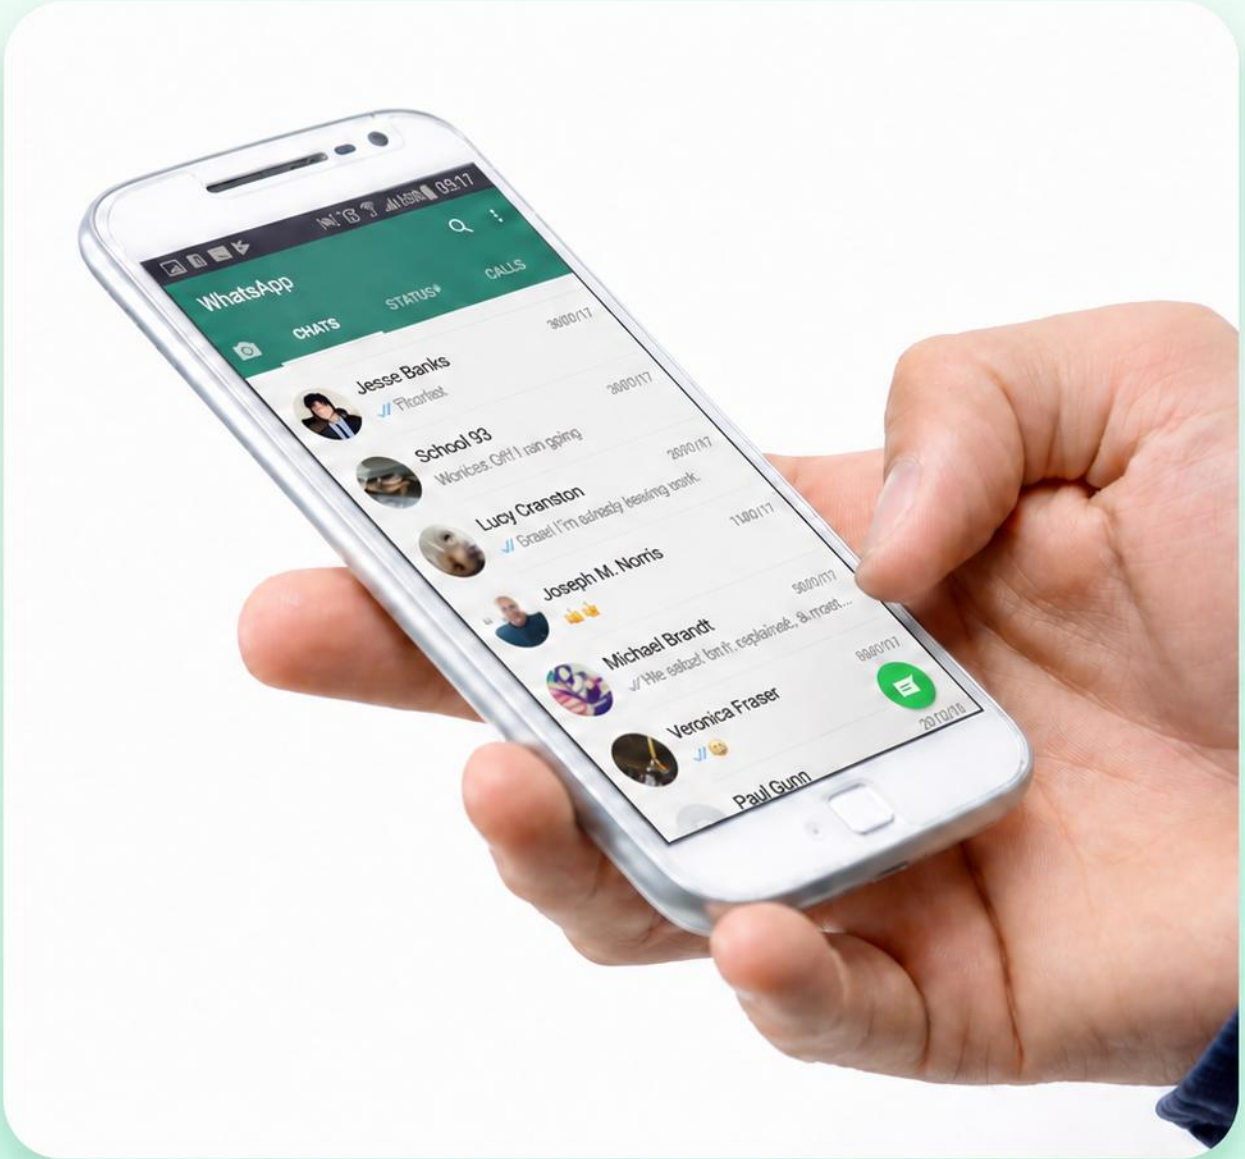

Tink.you — what is it?

THE BASICS

A new WhatsApp integration

A brand-new WhatsApp integration, launched in 2026 in Belgium and Luxembourg.

WHO'S IT FOR?

Those who receive tips

Gig economy workers, students and non-profits, to collect donations and tips more easily.

What’s a WhatsApp integration?

THE PRINCIPLE

No app to install

An app that no longer needs to be installed on your phone: it's available right inside WhatsApp.

THE TECH

Powered by the WhatsApp API

Instead of a real contact, it's an app: you send it messages and it replies.

So, how does it work?

THE ROLE

Your personal treasurer

Tink.you acts as the middleman: it discusses the amount, handles the payment, collects the money and passes it on to you.

More concretely?

THE PLATFORM

Sign up in one minute

You sign up in one minute, even a restaurant owner, and reserve a unique handle, just like on Twitter.

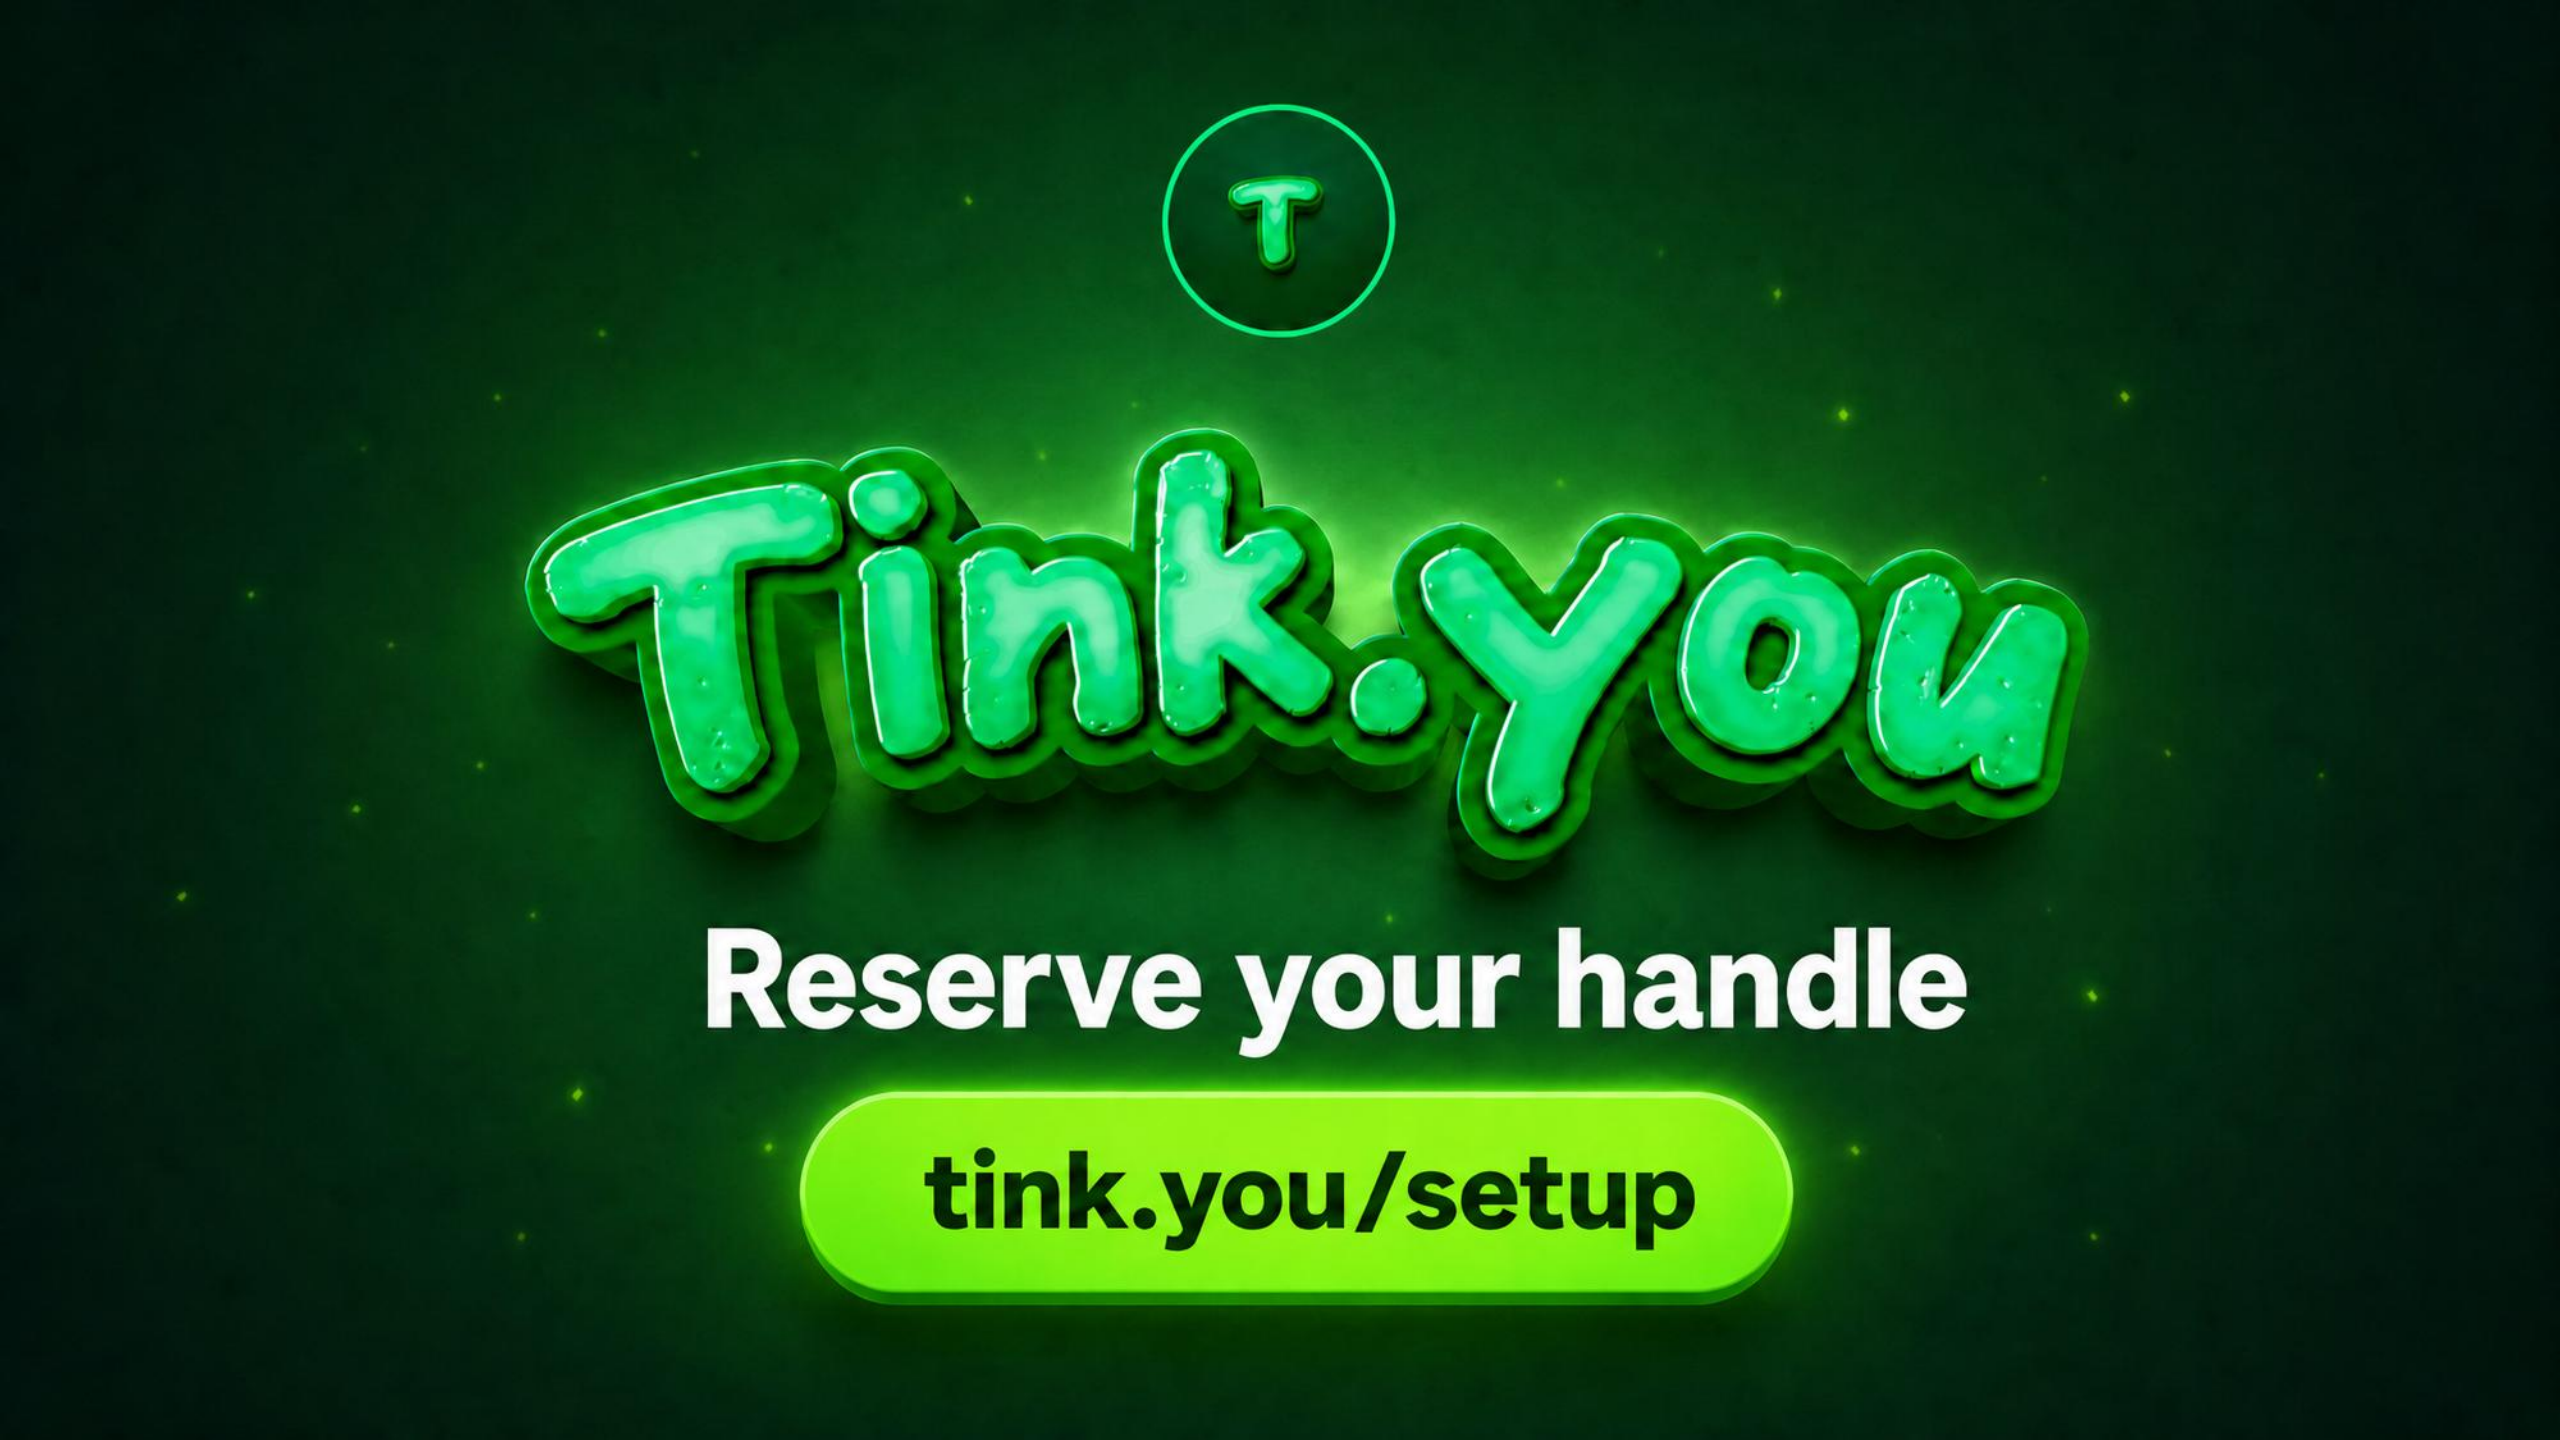

THE QR CODE

Stick, scan, get paid

Generate a QR code to stick anywhere.
The customer scans it, lands on WhatsApp
and pays whatever they want.
And that's pretty much it.
